

Supplementary Figure 1. Age-adjusted rates of major cardiovascular disease (CVD) events by household income and area-level disadvantage, in those with and without prior CVD

Household income

No prior major CVD

Prior major CVD

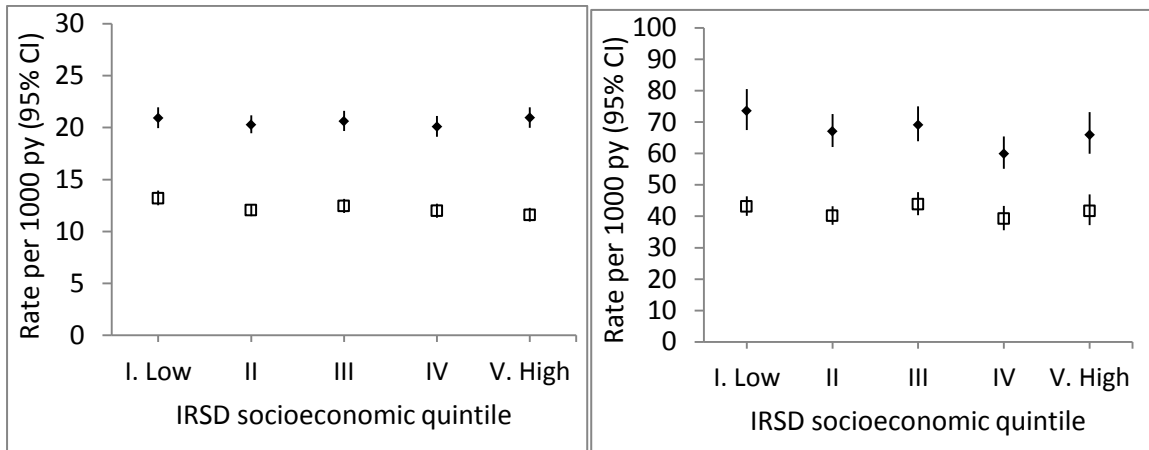

◆ Males, □ Females

Annual household income: I. < \$20,000, II. \$20,000-\$39,999, III. \$40,000-\$69,999, IV. ≥ \$70,000

Area-level disadvantage

No prior major CVD

Prior major CVD

◆ Males, □ Females

IRSD=Index of Relative Socio-economic disadvantage: I. Low- most disadvantaged through V. High - least disadvantaged.
