Patient Outcomes Assessment Sources and Examples
Survival
Physiological
Clinician-reported
Caregiver-reported
Patient-reported
For example
Survival curve
FEV1
HbA1c
Tumor size
Bone density
Cholesterol level
Global impression
Observation and test of functions
Morbid events (stroke, MI, hip fracture, etc)
Clinical events (hospitalization, coronary artery bypass surgery, etc)
Toxicity
Global impression
Morbid events
Clinical events
Dependency
Functional status
Symptoms
Global impression
Dependency
Well being
HRQoL
Satisfaction with treatment
Treatment adherence
