INFANT WEIGHING

- ✓ Please precisely **record all four numbers** on the scale, **do NOT round up or down**
- ✓ Baby should be weighed **NAKED**, without any clothing/blankets on
- ✓ It is important to weigh and record weights on **ALL** babies born, even premature <28 or stillborn

WEIGHING WITH A BLANKET

Unwrap infant and keep warm on mother's skin while you place the blanket on the scale **FIRST** before weighing the infant

With a single finger, press the **ON/TARE** button to set the scale to **0.000**

Now remove the blanket and the scale will remain **NEGATIVE** the weight of the blanket for several minutes

Finally, wrap the infant before placing on the scale and **record the weight** it reads
