

Supplementary Table 2. Components of the Sequential Organ Failure Assessment (SOFA) scoring system

Organ Failure Score	Respiratory	Neurological	Cardiovascular	Hepatic	Coagulation	Renal
	PaO ₂ /FiO ₂ (mmHg)	Glasgow Coma Score	Mean Arterial Pressure If hypotensive then vasopressor requirement	Bilirubin (mg/dL)	Platelets (x10 ³ /μl)	Creatinine (mg/dL)
1	< 400	13 - 14	MAP < 70 mmHg	1.2 - 1.9	< 150	1.2 - 1.9
2	< 300	10 - 12	Dopamine ≤ 5 μg/kg/min	2.0 - 5.9	< 150	2.0 - 3.4
3	< 200 mechanically ventilated	6 - 9	Norepi ≤ 0.1 μg/kg/min	6.0 - 11.9	< 50	3.5 - 4.9
4	< 100 mechanically ventilated	< 6	Norepi > 0.1 μg/kg/min	> 12	< 20	> 5

SOFA score equals the sum of six organ failure scores
