

Additional file 3: Figure S3

Western blot analysis of iNOS expression in BV-2 cells. (A) Representative Western blots of iNOS in BV-2 cells after Cu(II)-A β ₁₋₄₀ (at 5 μ M peptide), Cu(II), or A β ₁₋₄₀ stimulation (for 24 h). (B) Densitometric analysis of iNOS/ β -actin ratio normalized to saline control. n = 3 experiments. ** P < 0.01 vs con; # P < 0.05 vs Cu-A β .
