

Andrographolide attenuates LPS-stimulated up-regulation of C-C and C-X-C motif chemokines in rodent cortex and primary astrocytes

Siew Ying Wong, Michelle G.K. Tan, William A. Banks, W.S. Fred Wong, Peter T.-H. Wong, Mitchell K.P. Lai

Supplementary Fig. 1

Cell viability of primary astrocytes (in mean \pm S.E.M. % of untreated) after 48 h incubation with andrographolide and LPS at the indicated concentrations.
