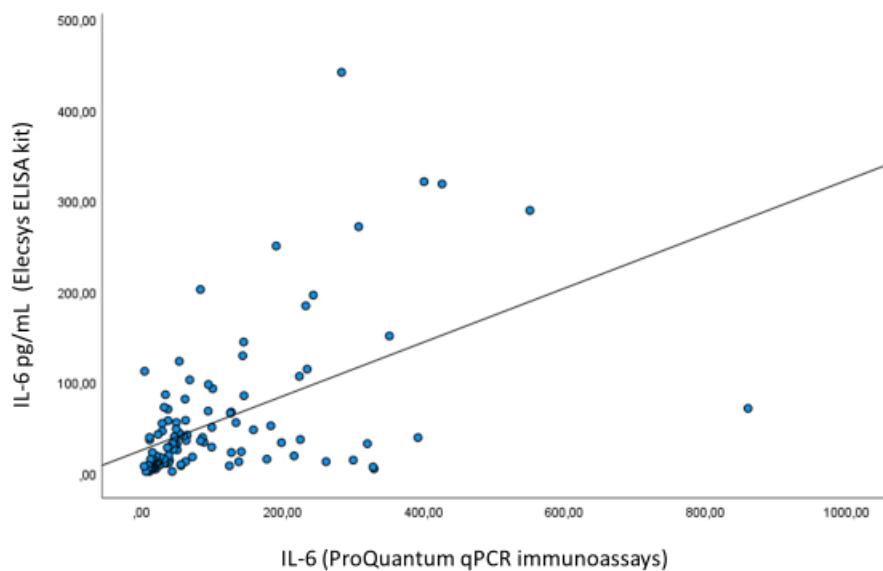

Figure S1. Spearman correlation between IL-6 serum levels assessed using the Elecsys ELISA kit and ProQuantum qPCR immunoassays.

Serum IL-6 levels were determined using two distinct assays: ProQuantum qPCR immunoassays (ThermoFisher Scientific) and the Elecsys IL-6 ELISA kit (Roche, Milan, Italy), which featured a detection range of 1.98-4372 pg/mL and a sensitivity of 1.5 pg/mL. Cytokine values were positively correlated with Spearman rho=0.602, p<0.0001
