

A**QuickAlign analysis of PCR product of Φ PSS genome raised by single primer (Sc2)**

Query location shown as colored bar in map between reading frames 1 and 2.

Query: 081201-22_E07_20-Sc2..ab1230

Query Length: 234

HB2 Location: genome: 3046? 3273reverse complement

Alignment used: HIV1 Complete DNA, 1240 sequences*

* Matched with different sequences from all over the world HIV genotype

Query location shown as colored bar in map between reading frames 1 and 2.
