Influencing Factors	**Guideline Implementation**	**User Attitude/Confidence in Guideline/Adoption Decisions**

Knowledge of implementation
• Instructional guidance
• Training
 	
Incentives for implementation
• Explicit responsibility
• Integrated with strategic plan
 	
Capacity for implementation
• Dedicated budget
• Operational plan, infrastructure
 	
Perceptions about implementation
• Advantage
• Trialability
• Compatibility
• Uncertainty
• Complexity
	Create 'implementable' guidelines
	• Format
	  o Publicly available
	  o Versions for differing purposes
	  o Organization of content
	
	• Content
	  o Presentation of evidence
	  o Clinical considerations
	  o Information for care recipients
	  o Individual/organizational impact
	  o Barriers of adoption
	  o Options for implementation
	  o Guidance for evaluation
	
	Identify barriers through needs assessment
	
	Tailor and apply implementation interventions
	
	Evaluate and monitor outcomes
		Evidence informed
		• Accessibility
		• Useability
		• Clarity
		• Validity
		
		Experiential/intuitive
		• Applicability
		
		Shared
		• Communicability
		
		Naturalistic
		• Balance opposing values
		• Prioritization
		• Accommodation
		• Resource mobilization
