

Feasibility (group 1, N=40)

```
graph TD; A[Feasibility (group 1, N=40)] --> B[Acceptability (group 4, N=125)]; B --> C[Reliability: test retest & initial internal consistency (group 2, N=42)]; C --> D["Factorial validity: (group 3, N=275)"]; D --> E["Criterion validity: (group 4, N=125)"]; D --- F["➤ Internal consistency: total score and subscales (group 3, N=275)"]
```

Acceptability (group 4, N=125)

Reliability: test retest & initial internal consistency (group 2, N=42)

Factorial validity: (group 3, N=275)

- Internal consistency: total score and subscales (group 3, N=275)

Criterion validity: (group 4, N=125)
