

Guidelines updating System

Legend

Class: abstraction of objects which share common properties (attributes) and behaviors (operations)

Relationship: Class A has a relationship with Class B

Multiplicity: indicates the number of possible instances

0..* means "zero-to-many"

1..* means "one-to-many"

Here, none to many objects of Class A is/are linked to at least one object from Class B

Relation of Composition: Class A belongs to Class B

Relation of Aggregation: there is a part-of relationship between Class A (whole) and Class B (part)
