

Supplemental File 5

Selection criteria qualifying cases for effect evaluation

SSR template ^A	Tissue	Retrieval technique
Appendix cancer	Appendix	All resections (with curettages and small excisions)
Bladder/Urethra cancer	(Bladder OR Urethra)	All resections (with curettages and small excisions)
		Biopsy
Cervical cancer	(Cervix OR UterusCervix OR Vagina)	All resections (with curettages and small excisions)
		Biopsy
Colorectal cancer*	(Colon OR Rectum)	All resections (without curettages and small excisions)
Endometrial cancer	(Endometrium OR UterusEndometrium OR Adnex)	All resections (with curettages and small excisions)
		Biopsy
Gastric / Oesophageal cancer	(Esophagus OR Gastric)	All resections (with curettages and small excisions)
Kidney/Pyelum/ureter cancer	(Kidney OR Pyelum OR Ureter)	All resections (with curettages and small excisions)
Ovarian cancer	(Ovary OR Tuba)	All resections (with curettages and small excisions)
Pancreatic cancer	Pancreas	All resections (with curettages and small excisions)
		Biopsy
Prostate cancer	Prostate	All resections (with curettages and small excisions)
Prostate biopsy	Prostate	Biopsy
Testis cancer	Testis	All resections (with curettages and small excisions)

^ASome tissue types have specific biopsy SSR templates used for reporting

In all selections molecular diagnostics and consultation/revision are excluded

* excluding (hyperplastic) polyp, adenoma, dysplasia, Inflammatory bowel disease, inflammation, infection, necroses, endometriosis, Hirschsprung, stoma, pouch, ischemia, cyst, lymphoma
