

ADDITIONAL FILE 3: FIGURE S1

Additional file 3: Figure S1: Full-length APP and DcR3 expression in four genotypes of mice at 6 months of age.

(a, b) Levels of full-length APP did not change between the APP and APP/DcR3 mice (c) Levels of DcR3 did not change between the DcR3 and APP/DcR3 mice (N = 18-22 mice per genotype). * $P \leq 0.05$. NS, not significant.
