

**Table S4**

<b>Gene name</b>	<b>Ratio of mRNA level (miR-506-3p/control)</b>	
	24 h	72 h
PLAGL2	0.470	0.785
CREB3L2	0.514	0.455

**Changes in mRNA expression of PLAGL2 and CREB3L2 induced by miR-506-3p mimic detected in the gene expression microarray analysis.** Shown are the gene name and the fold change of mRNA expression levels in terms of miR-506-3p vs. control treatment following 24 h and 72 h of transfection with miR-506-3p mimic in BE(2)-C cells.
