

How frequently do you try to optimize central venous pressure, arterial pressure, and cardiac output in this setting?

1. Never
2. Less than 5 % of the time
3. Between 5 and 25 % of the time
4. Between 25 and 50 % of the time
5. Between 50 and 75 % of the time
6. More than 75 % of the time

Central Venous Pressure
