

Total admissions in ICU
(01/01/2006 – 31/01/2013)

n = 5923

Total suspected VAP episodes
(1/1/2006 – 31/1/2013)

n = 631

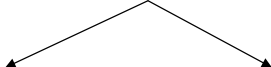

Total analysed suspected VAP episodes
n = 349

Excluded because :

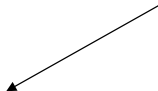

- inclusion into a clinical trial testing statins (n=52)
- missing data (n=22)
- CPIS < 5 points and ATB D1 = 0 (n = 208)

n = 282

Statin naive patients
n = 256

Statin previous users
n = 93

Drug discontinued after
ICU admission
n = 41

Drug continued after
ICU admission
n = 52
