

Supplemental Table 2. Tumor Incidence

Treatment	Tumor Incidence (N) <sup>a</sup>
LFD I	13.5% (37)
HFD I	26.5% (41)
LFD II	16% (50)
HFD II	25.9% (54)

Mice were treated with diet starting at 3 weeks of age, treated with DMBA, and followed for tumor development until 45 weeks of age.

<sup>a</sup> N = number of mice per group
