

SUPPLEMENTARY FIGURES

Supplementary Figure 1: EZN4150 reduces expression of p110 α without effecting p110 β : Cells were treated with EZN3046 (scrambled control LNA-ASO) or EZN4150 (p110 α targeted LNA-ASO) for 10 days, with fresh media and LNA-ASOs replenished every three days. **(A)** Cells treated with the indicated concentration of compounds were lysed and the lysates were analyzed by immunoblot with the indicated antibodies. **(B)** MDA-MB-361 (361), BT474, SKBR3 or HCC1937 (1937) cells treated with the 5 μ M EZN compounds were lysed and the lysates analyzed by immunoblot.
