

Additional file 23: Biological gradients between C2 and C3 in external cohort. Correlation coefficient calculation between GES score for each external cohort tumor (x number), and C'2 and C'3 cluster probability orthogonal projection on C'2-C'3 axis (y number) (C'2 tumor, red; C'3 tumor, green). Only correlation coefficient absolute values superior to 0.5 ($P < 0.0001$) are displayed.
