

Additional file 4: Projection of internal TNBC cohorts in the first PCA plane. (A) PACS08 patients (n = 131, [orange]) compared to TNBC patients of a previous study (n = 107, [black]). **(B)** Each color represents a recruitment site, except for greyish pale green color, which represents one or two patients recruited in different sites (n = 36 patients; 28 sites). Total number of recruitment sites was equal to 45.
