

Table 1. Summary of measures

	Measure	10-14 months Baseline lab visit	10-14 months Baseline home visit	12-16 months Inter - mediate home visit	10-18 months Intervention period	14- 18 months Outcome home visit	14-18 months Outcome lab visit	24 month follow up	36 month follow up
Parent questionnaires/ interviews	Demographic Interview	X							
	Demographic questionnaire	X							
	Medical and psychiatric history interview	X							
	Medical and psychiatric history interview	X							
	Sleep and Settle Questionnaire	X					X		
	Visual Media Exposure History		X						
	Sleep Diary				X				
	Visual Media Diary				X				
	Infant Behaviour Questionnaire Revised	X		X			X		
	Vineland Adaptive Behaviour Scales	X					X	X	X

	Early Child Behavioural Questionnaire							X	X
	Child Behavioural Checklist Preschool								X
	Preschool Diagnostic Interview Schedule for Children								X
	Behavioural Rating Inventory of Executive Functions								X
Observational assessments	Toy Play	X	X	X			X	X	X
	Free Play	X						X	X
	Mullen Scales of Early Learning	X						X	X
	Early Social Communication Skills		X	X			X		
Eye-tracking	Cognitive control task	X	X	X			X	X	
	Gap-overlap task	X	X	X			X	X	
	Sequence learning task	X	X	X			X	X	

	Sustained attention task	X	X	X	X	X
	Visual paired comparison task	X	X	X	X	X
	Distractor task	X	X	X	X	X
Neurophysiological	EEG	X				X
	Autonomic control measures	X				X

*Measures that contribute to the primary outcome are shown in dark gray and bold font; secondary outcomes shown in light gray.
