

**A** Concentration effects of Pentosan Polysulfate (PPS) on 35S-Glycosaminoglycan (35S-GAG) biosynthesis by human MPC in 5 days micromass cultures.

**B** Concentration effects of Heparin on 35S-Glycosaminoglycan (35S-GAG) biosynthesis by human MPC in 5 days micromass cultures.

**C** Concentration effects of Hyaluronan (HA) on 35S-Glycosaminoglycan (35S-GAG) biosynthesis by human MPC in 5 days micromass cultures.

**D** Concentration effects of Dextran Sulfate (DS) on 35S-Glycosaminoglycan (35S-GAG) biosynthesis by human MPC in 5 days micromass cultures.
