

Patient has 4 baseline tophi;  
2 measurable on the knee (A and B),  
1 measurable (C) and  
1 unmeasurable (D) on the hand

Target tophus outcomes  
for 4 tophi at 6 months

Left knee 1 (A)	CR
Left knee 2 (B)	PR
Right hand measurable (C)	CR
Right hand unmeasurable (D)	SD

Best "overall" patient  
response is CR without  
new/progressing tophi
