

Table 1							Reference Number
Presenting symptoms	Age	Prior History of Cancer	Radiological Test	Reported findings	Other Lab test	Biopsy/ Autopsy results	
Jaundice, vomiting, abdominal pain	56	Ductal carcinoma 9 months prior	CT	No abdominal lesions	Increased LFTs	Squamous cancer	1
Anorexia and general fatigue	66	Myxoid fungoides	CT & US	Normal liver	20 fold increased LFTs	Myxoid fungoides	10
Acid fever with elevated LFTs	58	None	CT-	Hepatomegaly	Elevated LFTs, low BUN & BCT	Peripheral T-cell lymphoma	12
Abdominal pain, decreased appetite	58	None	CT and US	Hepatomegaly and ascites	Low BCT	Small-cell lung cancer	13
Increasing ascites, jaundice, and hematochezia	54	Breast cancer 8 yrs prior	CT US	Probable benign cysts, ascites	Elevated LFTs	Poorly differentiated adenocarcinoma	4
Altered liver test	57	None	CT and US	Heterogeneous liver parenchyma	Thrombocytopenia	hepat. lobular carcinoma	5
Clinical signs of hepatocellular injury	55	Basal cell carcinoma	Liver MRI	Hepatomegaly	None reported	Basal cell carcinoma	14
Anorexia and abdominal distension	62	None	US and CT	Hepatomegaly and ascites.	Elevated CA-125	Melanoma	15
Abnormal liver function;	62	None	CT and MRI	Marked liver enlargement, no lesions	increased LFT	Small-cell lung cancer	6
Acute hepatic failure	66	None	CT scan	Negative	high LFTs	Metastatic prostatic carcinoma.	16
Gastrointestinal hemorrhage	65	None	CT	No liver metastatic disease	LFT elevation	Urothelial carcinoma	8
Acute severe hepatic failure	72	T-cell lymphoma	CT & US	Homogeneous enlarged liver, no ascites	BUN 5.1, increase LFTs	Small cell carcinoma	11
Infants with hepatosplenomegaly	05	None	CT, MRI	Liver enlargement	No hepatic amines	Neuroblastoma	9
