

Nasal cannula (No. 2)

The image shows a medical workstation with a nasal cannula (No. 2) connected to a blue corrugated tube. This tube is connected to a ViVO 30 ventilator, which is mounted on a stand. The ventilator is connected to a PMH200 humidifier, which is also on a stand. A clear plastic reservoir is attached to the top of the humidifier. A clear plastic bag is hanging from the top of the stand. A clear plastic bag is also hanging from the top of the stand. A clear plastic bag is also hanging from the top of the stand.
