

SUPPLEMENTARY MATERIALS

Figure S1: Trend of 60-month Hba1c vs baseline * p <0.001. Bars are standard errors

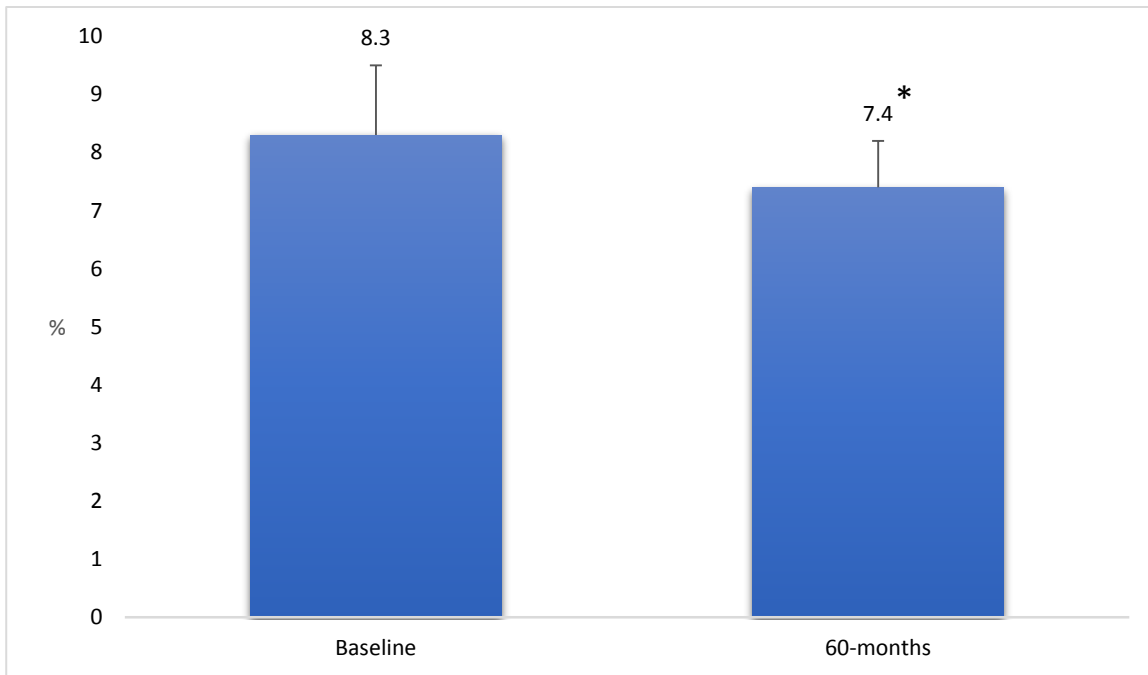

Figure S2: Percentage of patients with HbA1c <7% at baseline and 60 months. * p = 0.02 vs baseline

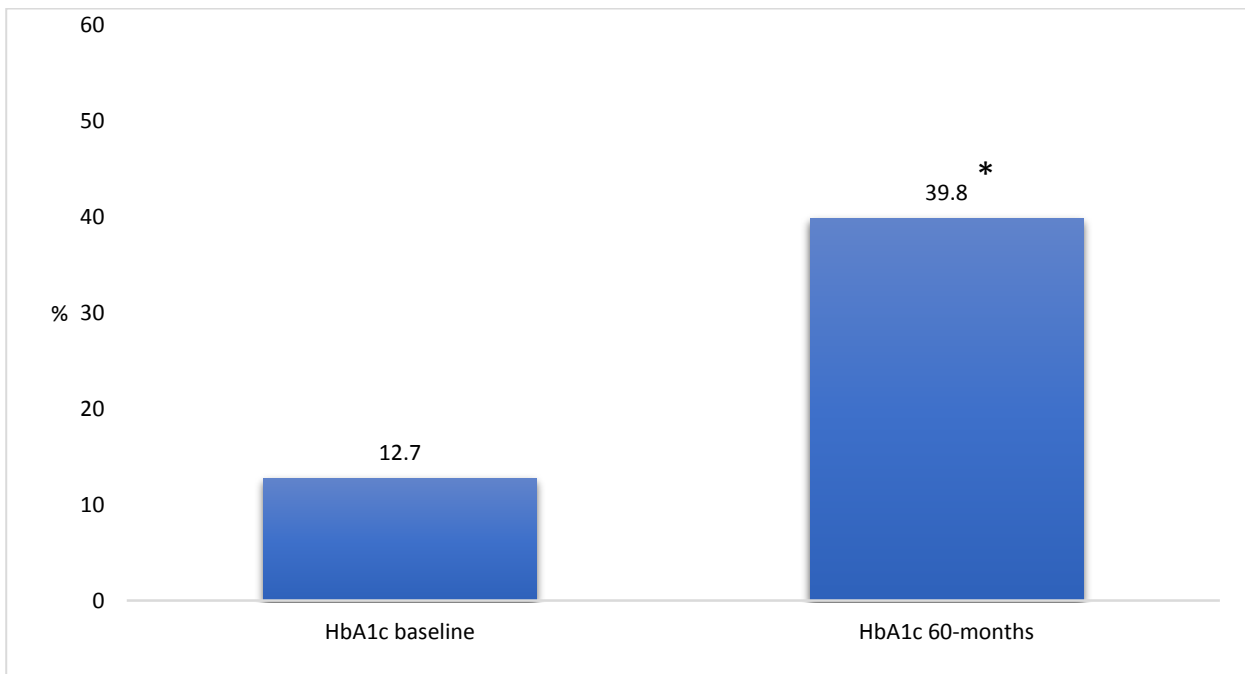

Figure S3: Trend of fasting plasma glucose at 60 months vs baseline * p <0.001. Bars are standard errors

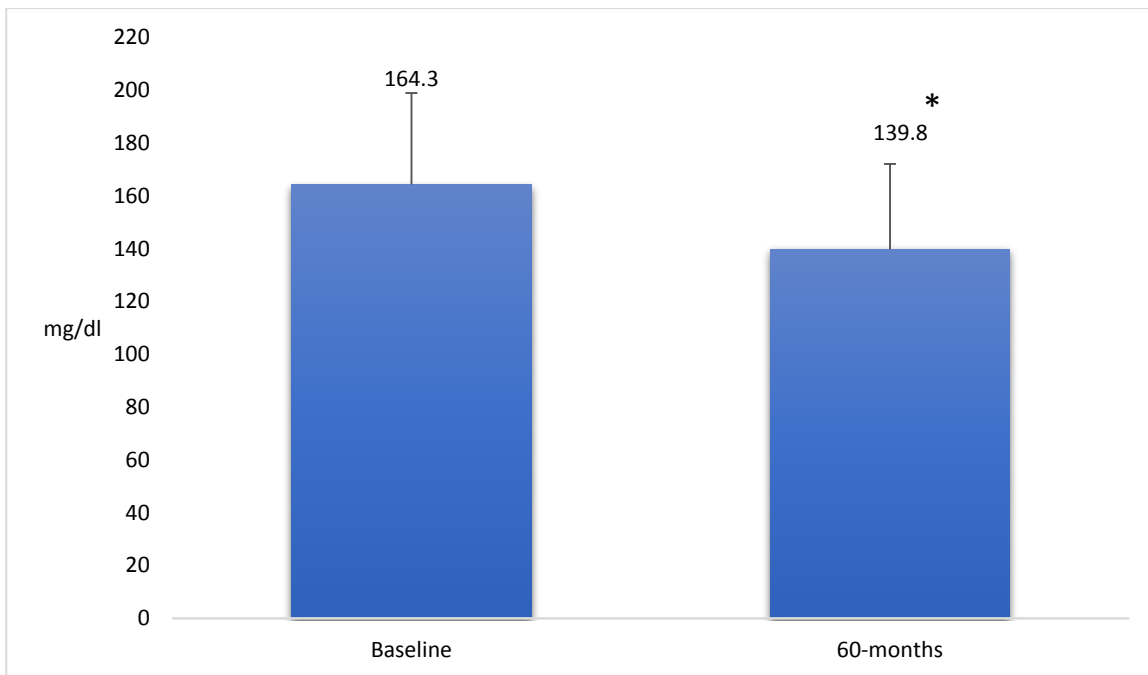

Figure S4: Trend of body weight at 60 months vs baseline * p <0.001. Bars are standard errors

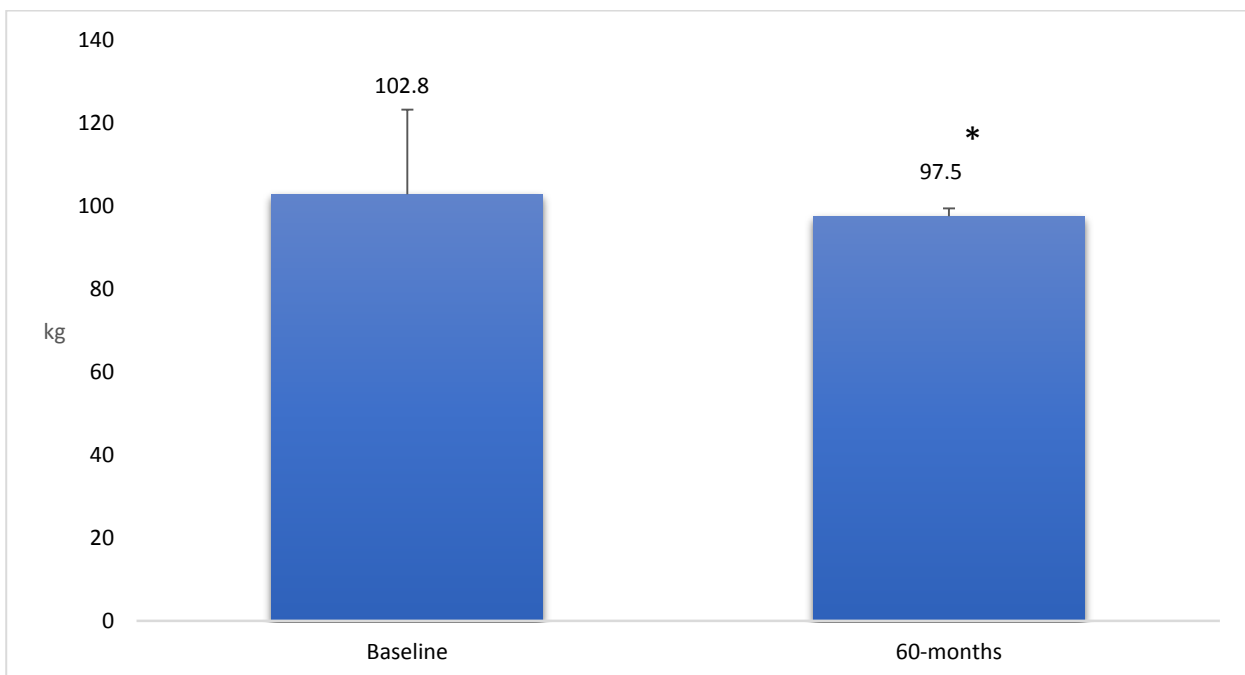

Figure S5: Changes in systolic blood pressure (SBP) and diastolic blood pressure (DBP) at 60 months vs baseline * p < 0.001. Bars are standard errors

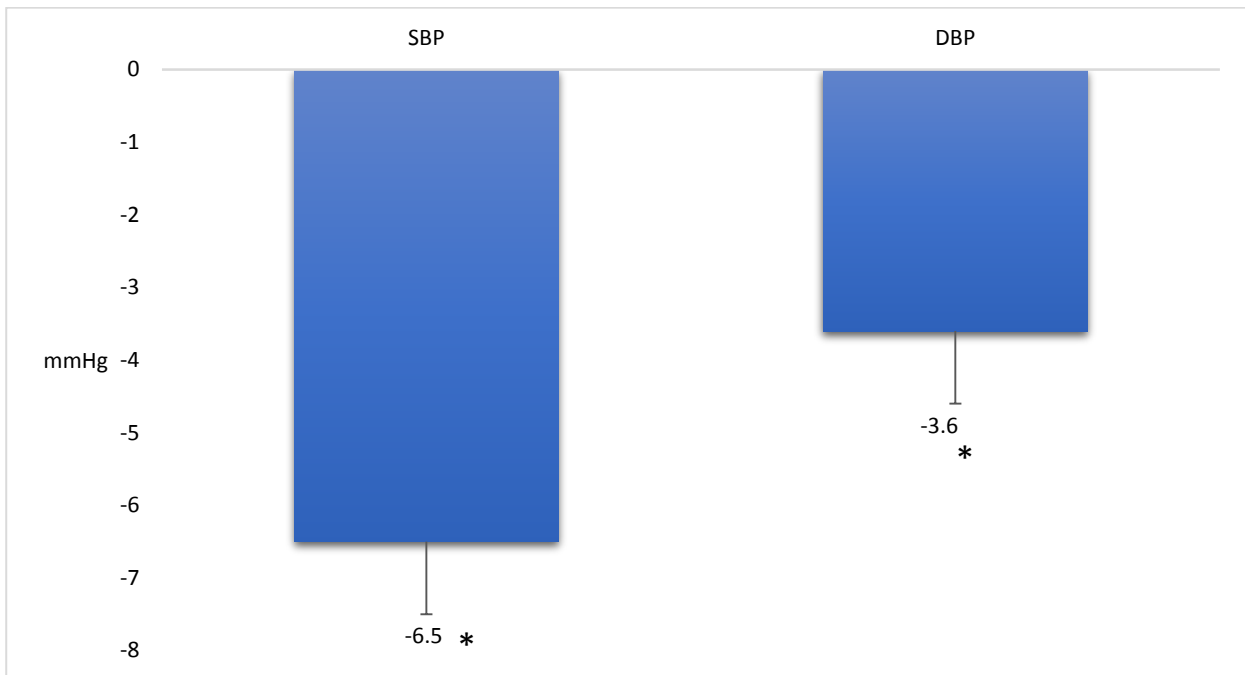

Figure S6: Lipid profile changes: total cholesterol (COL), triglycerides (TG), low density lipoproteins (LDL), high density lipoproteins (HDL) at 60 months vs baseline * p < 0.001 ≠ p = 0.001. Bars are standard errors
