**Table S1.** ICD-10 Codes to Identify Hospital-Treated AA

Description	ICD-10	Severity Subtype*		
		AT/AU	Non-AT/AU	All AA
Alopecia areata	L63		x	x
Alopecia (capitis) totalis	L63.0	x		x
Alopecia universalis	L63.1	x		x
Ophiasis	L63.2		x	x
Other alopecia areata	L63.8		x	x
Alopecia areata, unspecified	L63.9		x	x

\*For patients falling in more than one severity subtype based on the first-recorded ICD-10 codes recorded on the AA cohort entry date, patients were classified as AT/AU if they had the respective code. Otherwise they were classified as non-AT/AU to create mutually exclusive all-inclusive categories. AA, alopecia areata; AT, alopecia totalis; AU, alopecia universalis.
