Stationary treatment quality in Nuremberg metropolitan area Gallbladder Removal

2014

Legend

A40	Erroneous documentation will be confirmed (data validation)	
A41	Notices on structural or process deficiencies	
A42	No (sufficiently explanatory) reasons known for the computational discrepancy	Ranked as qualitatively discrepant after Structured Dialogue
A99	Other (explained in the comment)	
D50	Incomplete or erroneous documentation	
D51	Software problems caused erroneous documentation	
D99	Other (explained in the comments)	Evaluation not possible due to improper documentation
H20	Request on internal quality management to establish the analysis of calculated abnormalities	
H99	Other (explained in the commentary)	Remarkable result concerning calculations was pointed out to the institution
U30	Correct documentation will be confirmed (data validation)	
U31	Special clinical situation	
U32	The deviating result explained by isolated cases	
U33	No indication for medical quality faults (isolated documentation problems)	Quality assessment is unremarkable after structured dialog
U99	Other (explained in the comments)	
R10	Result computationally non-discrepant, therefore no Structured Dialogue required	Result within reference range
N01	Quality indicator without a result because no corresponding cases occurred	
N02	Reference range not defined for this indicator	Evaluation not planned
N99	Other (explained in the comments)	

Note:

Not highlighted cells have not been assessed as qualitatively unremarkable.
Cells marked in yellow have been assessed as qualitatively unremarkable.
Cells marked in grey have not been considered in the assessment.

CI	Confidence interval	
SD	Structured Dialog	
UE	Unfavourable single-event	
1	Presumably data show inconsistencies. It is presumed that Bad Windsheim is performing this service.	
2	Insurance claims data are referring to Waldkrankenhaus St. Marien gGmbH as a whole.	
3	May refer to more than one hospital location.	
4	Refers to all hospital locations.	
5	Incorrect documentation in single-events. Analysis of cases ensued. No indication for medical quality faults.	
6	The herein analyzed treatment was performed at Klinikum Nürnberg Süd. For single-events, patients are transferred to Klinikum Nürnberg Nord, e.g. due to comorbidities. Based on legal regulations, these patients must be shown here. Nevertheless the	
7	The main speciality department is located at Klinikum Süd. Treatment was executed there.	
8	In the meanwhile a new cardiac catheterization lab has been commissioned.	
9	Due to the commissioning of two new cardiac catheterization labs, the dosis protocols had to be adjusted.	
10	A significantly higher number of pressure wires (fractional coronary flow reserve) was performed to evaluate haemodynamical relevance of intermediary stenosis. Additionally a stent-enhancement-procedure was introduced.	
11	No quality faults affirmed after case analysis.	
12	Result is not rateable qualitatively.	
13	The herein analyzed treatment was performed at Klinikum Nürnberg Nord. For single-events, patients are transferred to Klinikum Nürnberg Süd, e.g. due to comorbidities. Based on legal regulations, these patients must be shown here. Nevertheless the	
14	The main speciality department is located at Klinikum Nord. Treatment was executed there.
