

Table 3. Median ICS dose increase following initial FeNO reading, split by FeNO category. Patients with a high FeNO had a significantly larger ICS dose increase than those with normal or intermediate levels at first assessment.

	Initial FeNO Reading			Total	p-value (Kruskal Wallis)
	Low	Intermediate	High		
n(%)	276 (55.5)	135 (27.2)	86 (17.3)	497 (100.0)	<0.001
Median (IQR) ICS dose increase (µg)	0 (0–261)	152 (0–382)	219 (109–429)	–
