

## FAB Assay

AIT patients (P1○; P2□; P3△; P4▽; P5◇)

**Additional file 6.** Correlation of Bet v 1-specific serum antibody titer measured by ELISA with percent inhibition of IgE-Bet v 1 complex formation measured by FAB assay. Serum samples were obtained at three different time points (T0, open; T1, semi-filled; T2, filled symbols) and correlated with each other.
