

Additional file 1: Objectives of the Project Advisory Group

The objectives of the Advisory Group are to:

- provide stakeholder perspectives on the scope of the synthesis and on emerging findings;
- inform the study design, including input into the search strategy;
- participate in strategic decisions about the project;
- advise on key policy, strategy and communication activities which may inform or impact this project;
- advise on the identification of key audiences and networks for dissemination activity;
- advise on dissemination formats, routes and activities;
- advise on interpretation of findings, to ensure relevance to stakeholders;
- support the translation of findings into actionable recommendations and tools for local health economies.
