1. Methodology

The following databases were searched for relevant studies: MEDLINE (via Ovid, 1946 to 20/Feb/2017; via PubMed, 1946 to 20/Feb/2017); Embase (via Ovid, 1947 to 20/Feb/2017); Biosis Previews (via Ovid, 1969 to 2017 Week 12); Global Health (via Ovid, 1973 to 2017 Week 06); Africa-Wide Information (via Ebsco); the Database of Abstracts of Reviews of Effects (via The Cochrane Library, to issue 2 of 4 April 2015); the CENTRAL Registry of Controlled Trials (via The Cochrane Library, to issue 1 of 12, January 2017); The Cochrane Methodology Register (via The Cochrane Library, to issue 3 of 4, July 2012); the NHS Economic Evaluation Database (to issue 2 of 4, April 2015); LILACS (via Bireme); ProQuest Dissertations & Theses Global (via ProQuest); Scopus (via Elsevier) and Web of Science (via ThomsonReuters) were searched for relevant studies. The search strategy used text words and relevant indexing to identify articles discussing trauma registries in low- or low-middle income countries. The full MEDLINE strategy (see below) was applied to all databases, with modifications to search terms as necessary.
