

a

Date: July 2010
Diameter of main lesion: 27 mm

b

First ^{213}Bi -DOTATOC: Sep 2010
Diameter of main lesion: 47 mm

c

Date: January 2011
Diameter of main lesion: 27 mm

Supplement Figure 4: Initial tumor spread with multiple liver metastases that receive i.a. therapy with ^{177}Lu -DOTATOC (a). Two month later only one lesion was massively progressive (arrows in (a) and (b)) and received i.a. therapy with 1 GBq ^{213}Bi -DOTATOC (b). In follow-up imaging partial remission was also demonstrated for this particular lesion (c).
