

MRI-derived extracellular volume as a biomarker of cancer therapy cardiotoxicity: Systematic review and meta-analysis

Electronic Supplementary Material

Supplementary Material 1: Search string.

Update: November 15th, 2022

Databases used: MEDLINE (PubMed), EMBASE (Elsevier), Web of Science (Clarivate Analytics), and the Cochrane Library databases (Cochrane Database of Systematic Reviews and Cochrane Central Register of Controlled Trials).

A controlled vocabulary (medical subject headings in PubMed and EMBASE thesaurus keywords in EMBASE) was used. The search string was built using the following strategy, based on the PICO model:

'extracellular space'/exp + synonyms

'cardiovascular magnetic resonance'/exp + synonyms

'chemotherapy'/exp OR 'radiotherapy'/exp + synonyms

'cardiotoxicity'/exp + synonyms

Full search strings

The full search string for EMBASE (Elsevier) was:
