

Table with columns for various identifiers and numerical values. The table contains multiple rows of data, each starting with a unique identifier (e.g., 1.1381034, 1.1312104, 1.1312105, etc.) followed by a series of numerical values. The values are organized into columns, with some columns containing multiple values per row. The data appears to be a structured list of numerical parameters or coordinates.
