

## Supplementary figure

Supplementary Figure 1. Cross-tabulation of attaining fatigue and pain changes  $\geq$  MCID at Day 169 in AGREE, AIM, and ATTAIN.

MCID for fatigue was defined as fatigue score change from baseline  $\leq -10$  mm. MCID for pain was defined as pain score change from baseline  $\leq -10$  mm. ABA: abatacept; DMARD: disease-modifying antirheumatic drug; MCID: minimum clinically important difference; MTX: methotrexate; PBO: placebo.
