

**Online Resource 3.** Summary of swallow-respiratory sound interpretation

Characteristics	Respiration at rest, pre-swallow	Swallow	Glottal release	Post swallow respirations
Normal	<ul style="list-style-type: none"> <li>• Tidal respirations (even breathing)</li> </ul>	<ul style="list-style-type: none"> <li>• Crisp, distinct, clear</li> <li>• Quick, coordinated.</li> </ul>	<ul style="list-style-type: none"> <li>• Present</li> </ul>	<ul style="list-style-type: none"> <li>• Expiration post swallow</li> <li>• Return to even breathing (as per pre-swallow)</li> </ul>
Abnormal	<ul style="list-style-type: none"> <li>• Breathing throughout oral phase (liquids)</li> <li>• Audible tongue pumping</li> <li>• Quality of sounds (wet, audible secretions)</li> </ul>	<ul style="list-style-type: none"> <li>• Dissociated</li> <li>• Dull</li> <li>• Constricted</li> <li>• Drawn-out</li> <li>• Choking</li> </ul>	<ul style="list-style-type: none"> <li>• Long apnoea</li> <li>• Absent</li> </ul>	<ul style="list-style-type: none"> <li>• Inspiration post swallow</li> <li>• Increased respiratory rate</li> <li>• Gurgling/bubbling</li> <li>• Crackles, wet, audible secretions (liquid vibrating sounds)</li> <li>• Stridor, wheeze</li> <li>• Coughing, throat-clearing</li> </ul>
